

A LEVEL PHYSICS INDEPENDENT STUDY

Between now and the exams in May/June

- Use the checklists on Kerboodle for each topic we have covered.
- Download the specification if you have not already done so.
- From the FORMULA SHEET, write each formula on an index card and around the formula write out any notes you can think of which apply to the formula, such as units and definitions.
- Learn the dozen or so **definitions**.
- Use the SENECA app – you have a free login.
- Practice Past questions and papers which are available from AQA website.
- There are many good YouTube videos which explain the physics concepts.
- Buy and use a CGP revision guide or the course textbook.
- Identify areas of weakness using past questions and seek help. Mr Shepherd is available most days P6 for help.
- Review the Practical Tasks. You will be tested on some of these, you need to know the method and how to gain valid and reliable results.
- You should be doing several hours of preparation and revision EACH week.

Physics A Level is tough, you need to get used to the question style and gain confidence. This happens with practice and hard work
