

## **Supporting Mental Health- A Guide for Parents/Carers**

“Mental health is a state of well-being in which every individual realises his or her own potential, can cope with the normal stresses of life, can work productively and fruitfully, and is able to make a contribution to her or his community.” (World Health Organization)

At our school, we aim to promote positive mental health for every student and every staff member. We pursue this aim using both universal, whole school approaches and specialised, targeted approaches aimed at vulnerable students.

In addition to promoting positive mental health, we aim to recognise and respond to mental ill health. In an average classroom, three children could be suffering from a diagnosable mental health issue. By developing and implementing practical, relevant and effective mental health policies and procedures, we can promote a safe and stable environment for students affected both directly and indirectly by mental ill health.

### **Lead Members of Staff**

Whilst all staff have a responsibility to promote the mental health of students, staff with a specific, relevant remit include:

- Mrs Reece - Designated Safeguarding Lead/SLT responsible for Mental Health/SEND/CO
- Mr Anderson - SLT also responsible for Mental Health and Pastoral Lead/Deputy Designated Safeguarding
- Mrs Charlton - Deputy Designated Safeguarding /Home School Liaison Officer
- Ms Wallace - Deputy Head and CPD Lead
- Mr Shields - Mental Health First Aider/Behaviour for Learning Co-ordinator

- Mrs Jones- Access Lead/Mental Health First Aider
- Mrs Macleod- Head of Personal Development

Any parent/carer who is concerned about the mental health or wellbeing of a student should speak to Mrs Reece/Mrs Charlton/ Mr Anderson in the first instance.

Any member of staff who has concerns about the mental health or wellbeing of a student should also speak to the Mrs Reece/Mrs Charlton/Mr Anderson. If there is a fear that the student is in danger of immediate harm then the normal child protection procedures should be followed with an immediate referral to the designated child protection officer, the head teacher or the designated governor. If the student presents a medical emergency then the normal procedures for medical emergencies should be followed, including alerting the first aid staff and contacting the emergency services if necessary.

Where a referral to CAMHS is appropriate, this will be led and managed by Mrs Reece, SENDCO.

## Teaching about Mental Health

The skills, knowledge and understanding needed by our students to keep themselves and others physically and mentally healthy and safe are included as part of our Personal Development curriculum.

The specific content of lessons will be determined by the specific needs of the cohort we are teaching but there will always be an emphasis on enabling students to develop the skills, knowledge, understanding, language and confidence to seek help, as needed, for themselves or others.

We will follow the PSHE Association Guidance to ensure that we teach mental health and emotional wellbeing issues in a safe and sensitive manner which helps rather than harms.

## Warning Signs

School staff /parents/carers may become aware of warning signs which indicate a student is experiencing mental health or emotional wellbeing issues. These warning signs should **always** be taken seriously and staff observing any of these warning signs should communicate their concerns with Mrs Reece/Mrs Charlton/Mr Anderson.

Possible warning signs include:

- Physical signs of harm that are repeated or appear non-accidental
- Changes in eating or sleeping habits
- Increased isolation from friends or family, becoming socially withdrawn
- Changes in activity and mood

- Lowering of academic achievement
- Talking or joking about self-harm or suicide
- Abusing drugs or alcohol
- Expressing feelings of failure, uselessness or loss of hope
- Changes in clothing – e.g. long sleeves in warm weather
- Secretive behaviour
- Skipping PE or getting changed secretly
- Lateness to or absence from school
- Repeated physical pain or nausea with no evident cause
- An increase in lateness or absenteeism

## **Signposting**

We will ensure that staff, students and parents are aware of sources of support within school and in the local community.

We will display relevant sources of support on student notice boards and will regularly highlight sources of support to students within relevant parts of the curriculum. Whenever we highlight sources of support, we will increase the chance of student help-seeking by ensuring students understand:

- What help is available
- Who it is aimed at
- How to access it
- Why to access it
- What is likely to happen next

## **Prevalence of Mental Health and Emotional Wellbeing Issues**

1 in 10 children and young people aged 5 - 16 suffer from a diagnosable mental health disorder-that is around three children in every class.

Between 1 in every 12 and 1 in 15 children and young people deliberately self-harm.

There has been a big increase in the number of young people being admitted to hospital because of self-harm. Over the last ten years this figure has increased by 68%.

More than half of all adults with mental health problems were diagnosed in childhood. Less than half were treated appropriately at the time.

Nearly 80,000 children and young people suffer from severe depression.

The number of young people aged 15-16 with depression nearly doubled between the 1980s and the 2000s.

Over 8,000 children aged under 10 years old suffer from severe depression.

3.3% or about 290,000 children and young people have an anxiety disorder.

72% of children in care have behavioural or emotional problems - these are some of the most vulnerable people in our society.

Below, we have sign-posted information and guidance about the issues most commonly seen in school-aged children. The links will take you through to the most relevant page of the listed website.

Support on all these issues can be accessed via [Young Minds](http://www.youngminds.org.uk) (www.youngminds.org.uk), [Mind](http://www.mind.org.uk) (www.mind.org.uk) and (for e-learning opportunities) [Minded](http://www.minded.org.uk) (www.minded.org.uk).

## Self-harm

Self-harm describes any behaviour where a young person causes harm to themselves in order to cope with thoughts, feelings or experiences they are not able to manage in any other way. It most frequently takes the form of cutting, burning or non-lethal overdoses in adolescents, while younger children and young people with special needs are more likely to pick or scratch at wounds, pull out their hair or bang or bruise themselves.

## Depression

Ups and downs are a normal part of life for all of us, but for someone who is suffering from depression these ups and downs may be more extreme. Feelings of failure, hopelessness, numbness or sadness may invade their day-to-day life over an extended period of weeks or months, and have a significant impact on their behaviour and ability and motivation to engage in day-to-day activities.

## **Anxiety, panic attacks and phobias**

Anxiety can take many forms in children and young people, and it is something that each of us experiences at low levels as part of normal life. When thoughts of anxiety, fear or panic are repeatedly present over several weeks or months and/or they are beginning to impact on a young person's ability to access or enjoy day-to-day life, intervention is needed.

## **Obsessions and compulsions**

Obsessions describe intrusive thoughts or feelings that enter our minds which are disturbing or upsetting; compulsions are the behaviours we carry out in order to manage those thoughts or feelings. For example, a young person may be constantly worried that their house will burn down if they don't turn off all switches before leaving the house. They may respond to these thoughts by repeatedly checking switches, perhaps returning home several times to do so. Obsessive compulsive disorder (OCD) can take many forms – it is not just about cleaning and checking.

## Suicidal feelings

Young people may experience complicated thoughts and feelings about wanting to end their own lives. Some young people never act on these feelings though they may openly discuss and explore them, while other young people die suddenly from suicide apparently out of the blue.

## Eating problems

Food, weight and shape may be used as a way of coping with, or communicating about, difficult thoughts, feelings and behaviours that a young person experiences day to day. Some young people develop eating disorders such as anorexia (where food intake is restricted), binge eating disorder and bulimia nervosa (a cycle of bingeing and purging). Other young people, particularly those of primary or preschool age, may develop problematic behaviours around food including refusing to eat in certain situations or with certain people. This can be a way of communicating messages the child does not have the words to convey.
