Selecting your GCSE options online

The form to select your options is now available online.

1. If you have not registered before you will receive an email to your school inbox with a registration link. It will be from noreply@sims.co.uk . If you have successfully logged in before then go to step 3.

2. Click on the link in the email and select from the options- **'Sign in with Google**'. You can then select your school email address to complete registration. Your registration details will be loaded up - click **Register**. As a final check, you will be asked to enter your date of birth so we know we have the correct person.

3. Open a new tab and go to **http://www.sims-options.co.uk** . Click on **'Sign in with Google**'. You can then select your school email address and you will be taken to your options form.

4. You can then select your options. In the first section you must select History or Geography for your Humanities choice. Then go to the next section to make your next two choices. Click the subject itself to make it go blue.

5. You must select an additional option as a back up choice - click on the 'Reserve' button to the right of the subject so that it turns orange. In the section on the right of the page you must check the order of your choices by dragging and dropping them. This helps us to know what you prefer in case we are unable to offer you all your choices.

6. Once you have made your choices then you must click on **Save** in the top left corner of the screen.

7. **If you want to make any changes or wish to add new options later on:** You can log back in again until the final deadline: the web address is **www.sims-options.co.uk** . Again, you can use the 'Sign in with Google' option and your school email address to log in. Do not use the link contained in the registration link- this was only for the first time to set up your account.
