

Holocaust Memorial Day

This project was the first that took place between St Patrick's and our Italian partner school **Istituto Comprensivo Statale** using Etwinning as our platform to showcase work. The project started from the activity each teacher has planned for their students on the theme of the Holocaust. Reading a few pages of the Diary of Anne Frank, it will be underlined the important events resulted in Anna's life in the secret accommodation.

At the end of the activity, as a reflection, the children will build a large tree of peace, on which they can attach the leaves upon, which each student will have written (in the native language and in English) a brief reflection on the subject. At the end they can draw and colour the flag of their country. The project provides for the sharing of the leaves with classes participating in the initiative. The trees of each school will enrich the leaves and reflections of all the companions from all over Europe.

Take a look at our EBook to mark our work together.
